- 1. The Mcfem Metal Processing Works (Moschmagyarovari Femfeldolgozo NV) at 9 Lajtasz Street in Mosormagyarovar (F 48/V lo) was located southwest of the Lajta River and was a nationalized plant which had formerly produced sporting cartridges, detonators and metal goods.
- 2. The plant consisted of departments including a pencil producing department, a copper cutting department, an aluminum and an iron cutting department, a foundry, a pressing department, a bar drawing mill, a gas hearth producing department, a gas meter producing department, an electrolytic oxidation department, a tinsmith's workshop, a machine repairing shop and a tool workshop. It was equipped with machinery mainly of German make and was supplied with current by the Banhida (Q 48/Y 94) power station or its own generating plant which was overhauled in January 1952 and was capable to cover the plant's demand and that of the town.
- 3. The plant produced gas hearths, gas meters, propelling pencils, greasing implements for machines and V-19-type mine detonators. The production of V-19-type mine detonators which had started in January 1952 and amounted to about 1,200 detonators per month involved more and more departments of the plant with a view to reach a monthly output of 5,000 detonators and to gradually abandon the production of all other articles. The works produced products of good quality and, in 1951, was awarded the first price for factories of the third category in a quality competition. Source was not in a position to give information on the origin of the raw materials.
- 4. The plant had a working staff of about 1,200 to 1,300 persons including about 750 women. The iron and aluminum cutting department worked in three shifts, the copper cutting department and the bar drawing mill in two shifts and all other departments in one shift.
- 5. The leading staff of the plant consisted of persons including frace Kertesz, serving as general manager of the plant, who was about 40 years old, 160 cm tall, had black hair and was a former mechanic; Leiczinger (fnu), serving is technical manager, who was about 36 to 38 years old, 170 cm tall, slender, had a lean pock-marked face, brown hair and was a former laborer; Viktor Godo, herving as chief engineer of the technical department, who was about 28 years

old, 175 cm tall, had a round face and brown hair; Maria Molnar, serving as chief of the personnel department, who was about 38 years old, had a round face, black hair and was stender; Antal Vitez, serving as MDP secretary, who was 33 years old, 168 cm tall, stender, and was a former foundry mouldary Mihaly Prejer, serving as secretary of the works council, who was about 26 years old, 165 cm tall, had a longish face, fair hair, and was a former lathe operator; Laszlo Csapo, serving as chief of the labor department, who was about 38 years old, 180 cm tall, stender, had a longish face, brown being and was a former joiner. No Soviet specialists or deportees were employed in the plant.

. It was rumored among the working staff that the whole plant was to be transferred to the interior of the country. Old lathes were, however, still mounted in the plant.

SECRET 25X1A 25X1A Comment. The shipments and novements observed are commented on as follows: Li July Probably entraining of a unit of the 312th Gds RI Regt of the Fourth Gds Mecz Army for Altengrabow. This unit, according to remorts on transportation, returned from Altengrabow to Eberswalde on 24 July under shipment-record No 61331. 12 July Entraining of units of the 63d AAA Div (UE), presumably for Wustrow. Another source, on the same day, reported the entraining of Light AA guns in Eberswelde. See L 25X1A 25X1C the column belonged to the 6th Gds Necz Div and presumably involved elements of the division from Bad Freienwalde, which transferred to Ferlin by road, The composition of the column, however, contradicts this assumption to some extent, as the 240th Cds Nort Regt of the division is believed stationed in Eberswelde. 18 July, Possibly a shipment of AAA units of the air force, which, according to reports on transportation, went from Wustrow to Welzow on 18 July under 25X1C shipment-record No 61866. 21 July Possibly a shipment of units of the 63d AAA Div (US) to Vustrow. This shipment of nine rocket launchers had been observed in Frankfurt/Oder as early as 22 July. 25X1A Comment. Equipment of the 3d Engr Regt of the Fourth Gds Mecz Army was presumably entrained on 27 July. On 31 July, the entraining possibly involved units of the 312th Gds RL Regt of the Fourth Gds Mecz Army, which went to a training grounds for firing practices. 25X1C 25X1C
